Please - reject petition 04-160! In my travels throughout the US I have never found traffic and weather information as easily as I have since I joined XM! In a recent winter trip, my girlfriend tried to keep me updated on weather conditions through the internet and relayed them to me by cell phon. We lost contact and I hit a terrible snow storm with dangerous driving conditions while moving across country.

I was driving a Uhaul truck pulling a car and visability was awful. Had I had XM at the time - I would have known to stop and wait out the storm. Please, do not block this valuable comodity!

Sincerely

Mike Pierce
